# Plastic Ventilators Plastic Components

- Radial Fans
- Axial Fans
- Bifurcated Axial Fans
- Roof Type Fans
- Duct Type Fans
- Washer
- Silencer
- Air Flow Controller
- Special Components

## Radial Ventilators

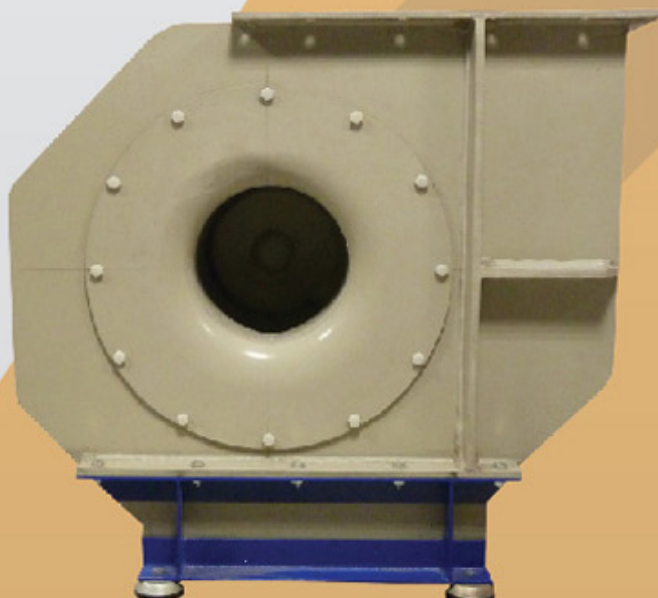

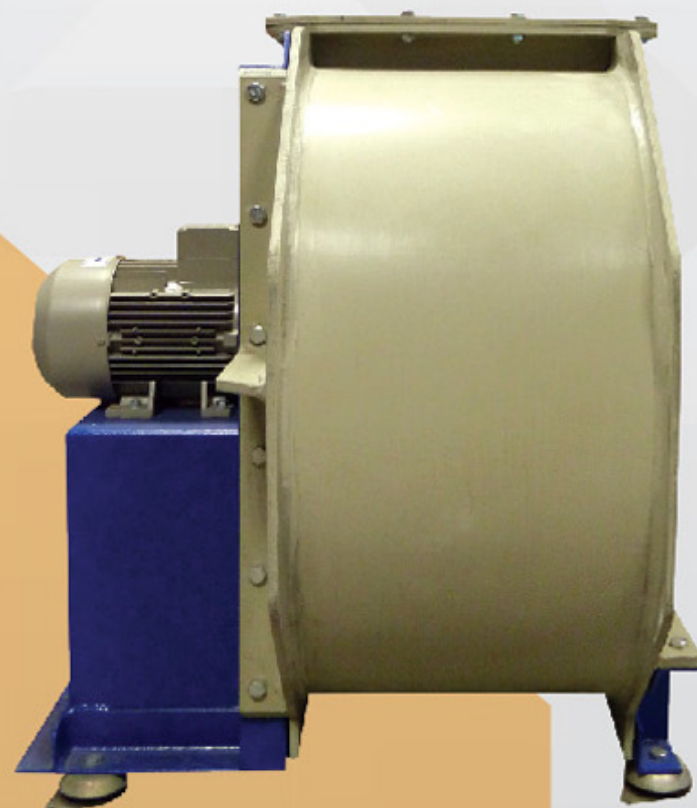

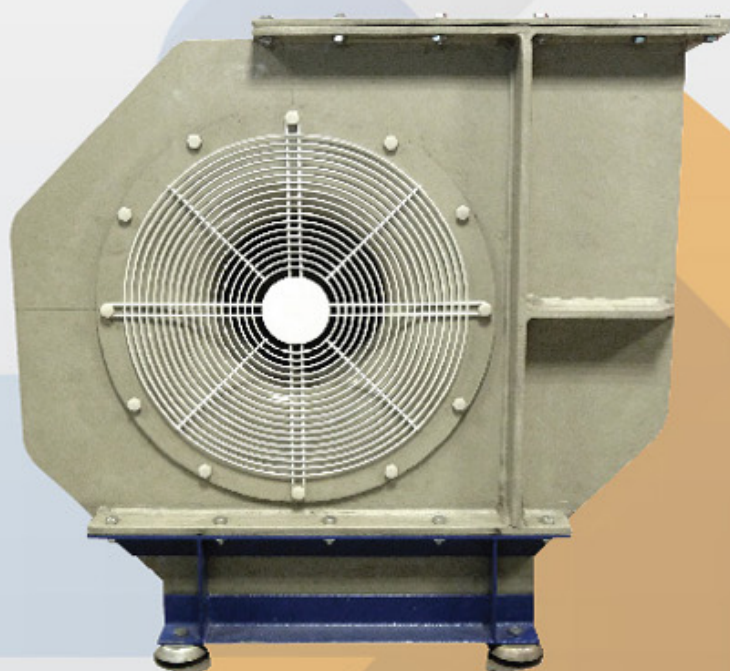

- Polypropylene fans developed especially for use in corrosive gases, humid and polluted air, alkali gases and environments where corrosive smoke exist. These type of polypropylene fans offer a realistic alternative to stainless steel and nickel alloy steel.
- Selection ranges are prepared for your specific requests such as air volume temperature and pressure.
- Direct drive, belt drive and coupling drive options.
- Please contact us for more detailed information.

### Air Volume

100 - 100,000m<sup>3</sup>/h

### Pressure

0 - 3500Pa

- Highly resistant to corrosion
- High efficiency
- Polypropylene impeller and casing or special materials upon request
- Low noise level
- Reliable and long-lasting
- Light weight

## Roof Type Ventilators

- Suitable for extraction aggressive exhaust air and gases.
- Electric motor is out of exhaust air range.
- Direct driven radial impellers.
- Special materials and applications, such as stainless steel impellers, can be used upon your request.

Air Volume	Pressure
100 - 30.000m <sup>3</sup> /h	0- 1200Pa

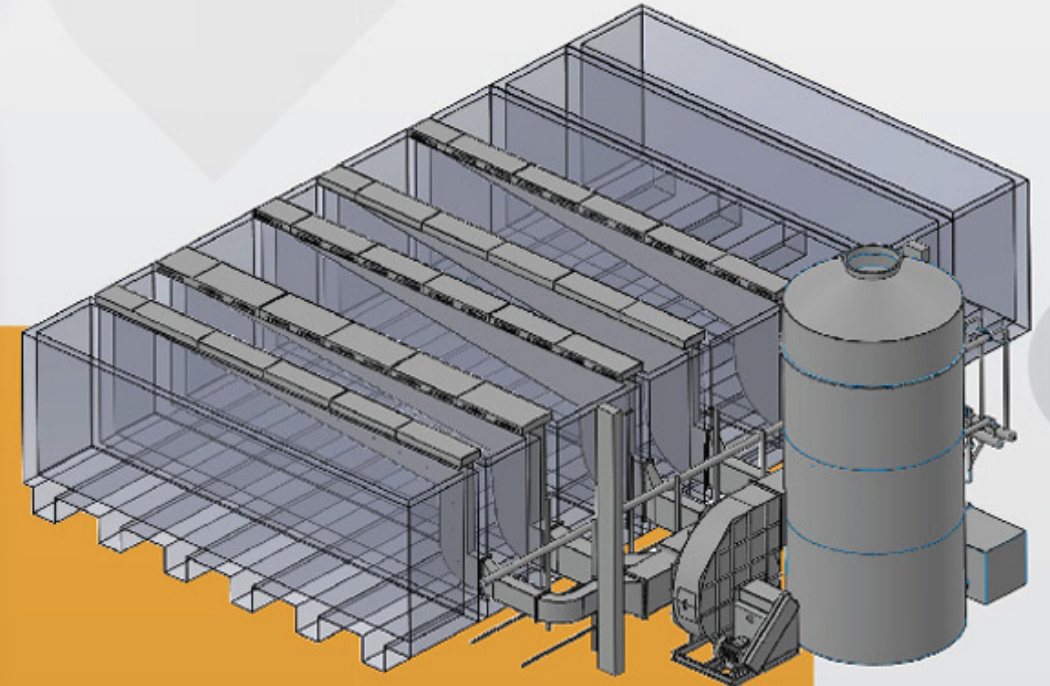

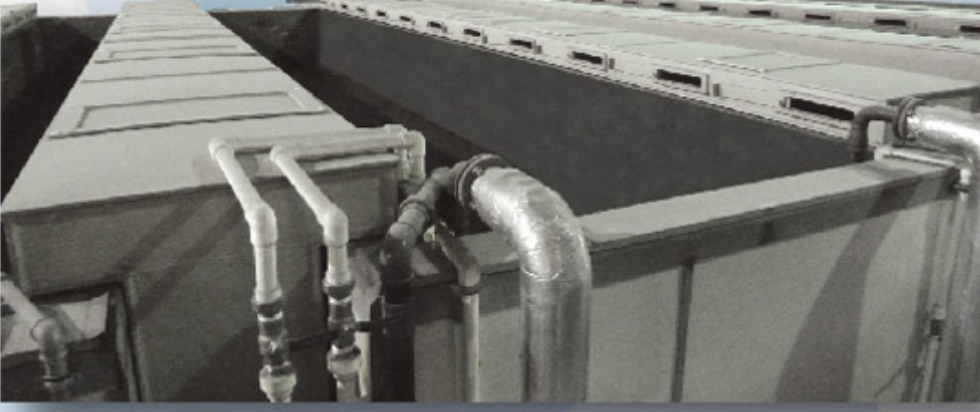

## APPLICATION AREAS

- |  |   |
|--|---|
| <ul style="list-style-type: none"><li>• Air Pollution Control</li><li>• Chemical Processes</li><li>• Electronics Industry</li><li>• Electro-Plating Plants</li><li>• Food Industry</li><li>• Laboratories</li><li>• Paper Production Industry</li><li>• Aluminium Industry</li></ul> | <ul style="list-style-type: none"><li>• Metal Recycling Plants</li><li>• Textile Industry</li><li>• Hospitals</li><li>• Waste Incineration and Recycling Plants</li><li>• Water Treatment Plants etc.</li></ul> |
|--|---|

## Special Applications

- Plastic Ducts
- Scrubber units for washing down the dirty air
- Special piping projects etc.
